

## Collection Of Mid-Stream Urine For Bacterial Culture & Sensitivity 中段尿液細菌和藥物測試

---

### Preparation and Instruction for Investigation:

1. Patient is advised to wash hands pre-procedure.
2. For female patient, hold labia apart and pass the first portion voided urine into toilet and collect midstream urine into a clean polypropylene container without preservatives to 1/2 full.
3. For male patient, retract foreskin and pass the first portion voided urine into toilet and collect midstream urine into a clean polypropylene container without preservatives to 1/2 full.
4. Close the lid of the container tightly and label appropriately.
5. Please send specimen together with request form to the Clinical Laboratory. Specimen should deliver as soon as possible. Please store at 4 - 8°C if not deliver immediately.

### 測試準備及須知:

1. 病人需於採集標本前潔手。
2. 女性應拉開外陰部或男性應拉緊包皮將前段尿液排走棄置，將中段尿液留於已消毒的聚丙烯容器至 1/2 瓶滿。
3. 將容器蓋好及扭緊，確定樣本不會滲漏。
4. 在該容器適當位置貼上病人標籤。
5. 請盡快把樣本連同檢驗單送往化驗室。若無法立刻送往化驗室，請保存樣本 4 - 8°C。
